

The countryside library undertaking in China can only take the strategy of the steady development and making a stand at every step. Because of the restraint of economic powers in the 8th five-year plan period. There are some combination in the development of the library cause. Its are: combine the guide of the county and countryside with the development of the grassroots unit; combine consolidating and strengthening the "run by the public" with developing the "run by the civilian"; combine the government run the cause with the mass group run the cause; combine the integrative library(house) with the specialized library (house); combine the daily works with the works of the government.

The library cause — China

The library of countryside — history.
